

Remote lighting control: Maxlight Magnetic - Gateway and Application

Smart lighting is becoming an increasingly popular solution in today's homes, offering users greater control over light and convenience of use. To maximize the potential of intelligent Maxlight Magnetic luminaires, two key components are necessary: a gateway and a mobile application. These elements establish a communication bridge between the user and the lighting, allowing remote control and adjustment of lighting parameters with ease and convenience. In this article, we will present why the gateway and mobile application are essential elements of the Maxlight Magnetic smart lighting ecosystem and what benefits they bring to users.

Instructions for pairing with the gateway:

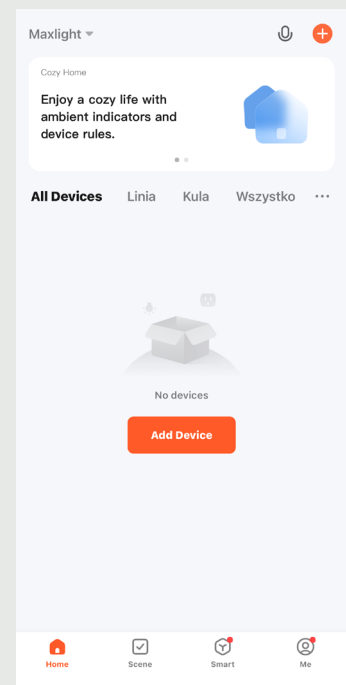

1. Download the Maxlight Smart app and log in or register an account.

Start by downloading the Tuya app from the Google Play Store or Apple App Store to your mobile device. After installing the app, log in to your existing Tuya account or create a new one if you don't already have one.

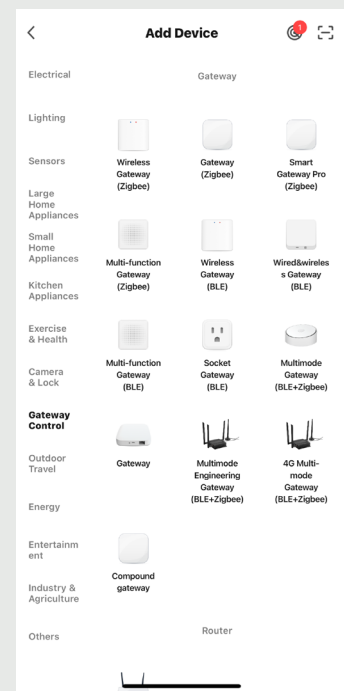

2. Add a Zigbee gateway using the Tuya app.

After logging in to the application, select "Add new device".

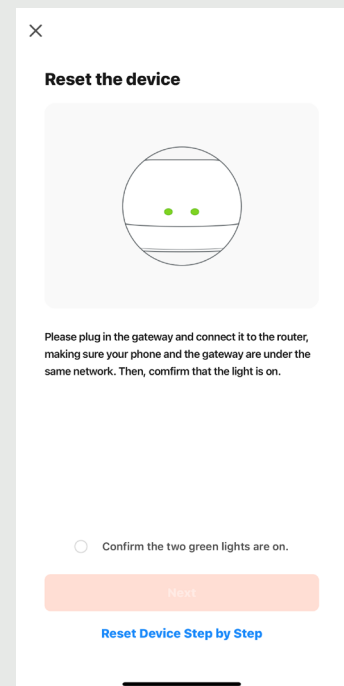

3. Find the right gateway.

Select "Gateway (Zigbee)" from the list of available devices. Make sure the Maxlight Magnetic Gateway is connected to power and ready to pair.

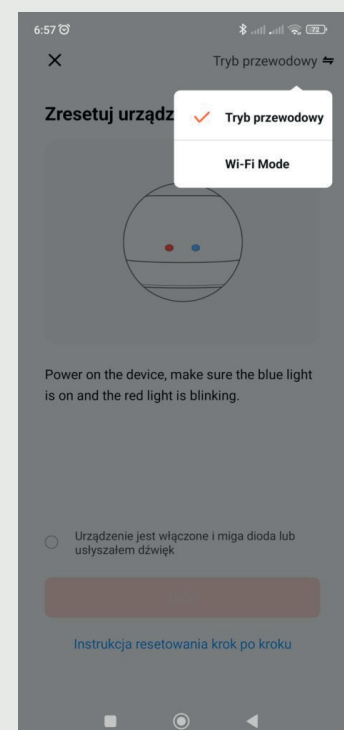

4. Gateway pairing.

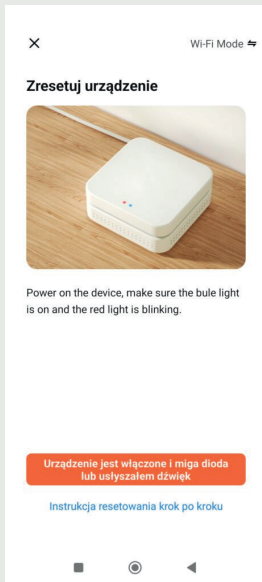

Enable pairing mode on the Zigbee gateway by holding the reset button for about 5 seconds until the indicator lights start flashing rapidly (e.g. red flashes, blue stays on).

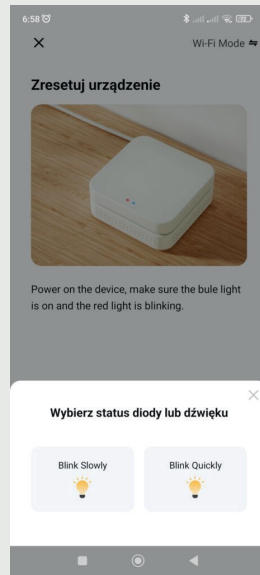

5. Select a mode.

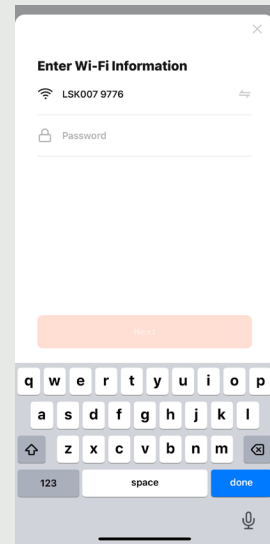

6. Reset your device

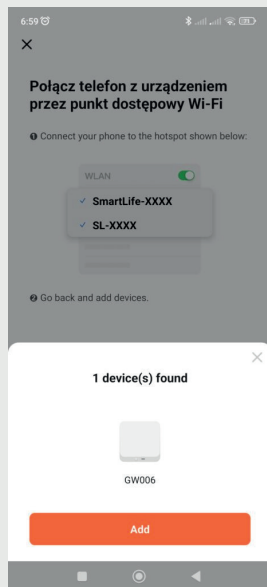

7. Select the LED status

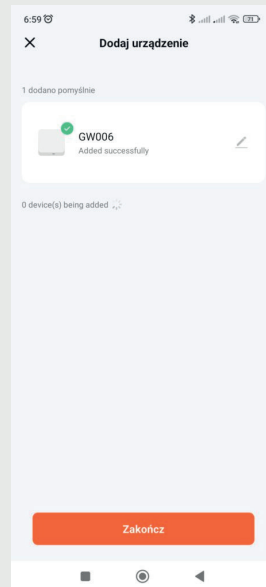

8. Connect the gateway to WiFi

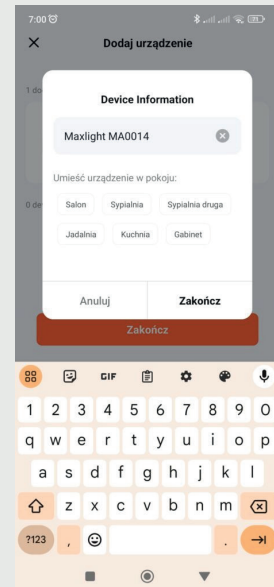

9. Add a Gateway.

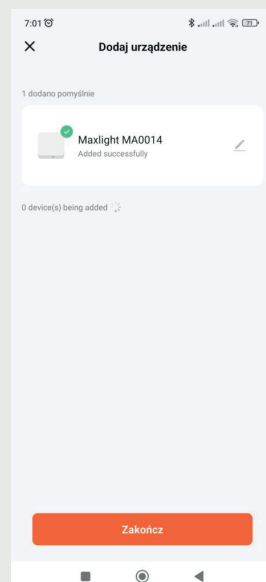

10. The Gateway has been added

11. Rename the gateway

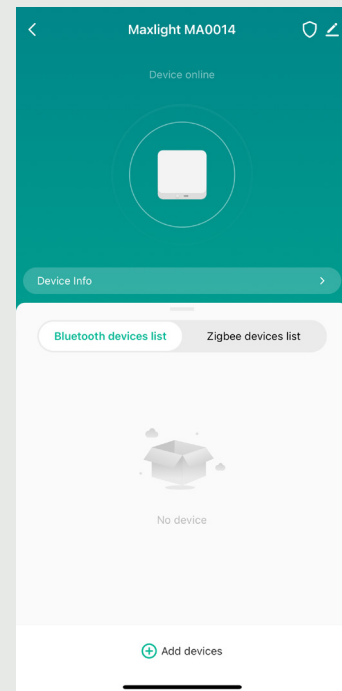

12. Finish setup.

Adding the Maxlight Magnetic fixture to your application:

1. Open the Tuya app.

Launch the Tuya app on your smartphone or tablet.
Make sure you are logged in to your account.

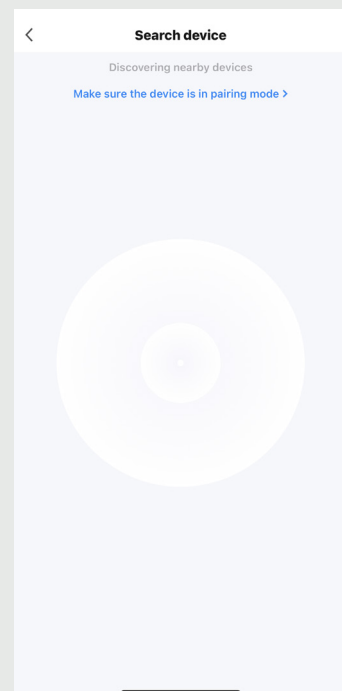

2. Add a new device.

From the main app menu or home screen,
find and select "Add devices" or the "+" icon

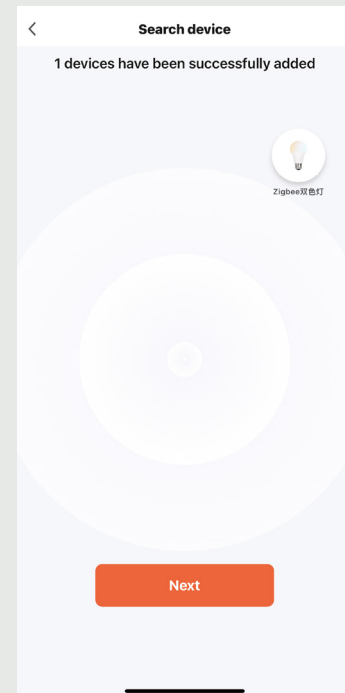

3. Prepare the lighting fixture.

Make sure the light is on and in pairing mode.
Maxlight Magnetic fixtures should begin to flicker
or pulsate.

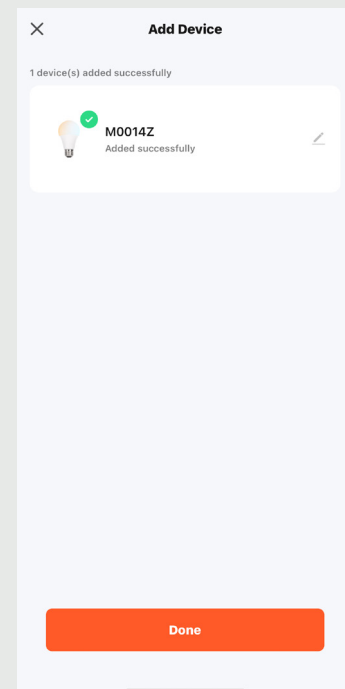

4. Search for devices in the app.

The Tuya app will start automatically searching for available devices nearby. Wait until your lighting is detected.

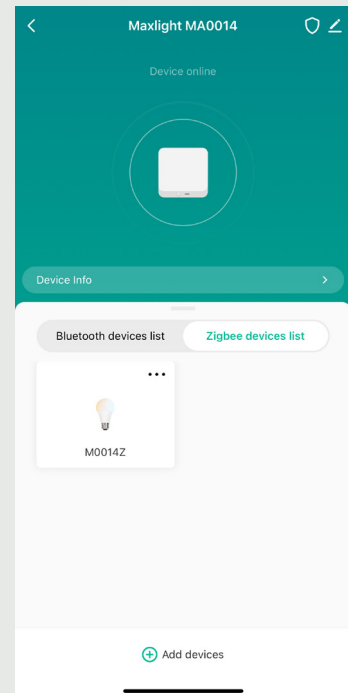

5. Select lighting to add.

Once your lighting is detected, a list of available devices will appear on your screen. Select the appropriate device from the list to continue.

6. Finish adding the device.

After successful connection, the application will confirm the success of adding the device. You will usually see a confirmation message or screen. Make sure the lighting responds as you expect.

7. Finished.

Congratulations! Now your lighting has been successfully added to the Tuya Smart Life app and is ready for intelligent control from your mobile device. Repeat this process to add more lighting or other smart devices to your app.
