

USER MANUAL: PREPERATION FOR USE

PREPERATION FOR USE

1. This product is designed to connect to a network via **2.4 GHz Wi-Fi**, so please ensure your Wi-Fi network is configured in advance.
2. Prepare the necessary tools, such as a screwdriver, pencil, electrical tape, etc.
3. Do not use the device while it is connected to the power source.

DOWNLOADING AND SETTING UP THE APPLICATION

To download and install the app, search for "TUYA" in the App Store or Google Play Store. If you're using the app for the first time, click "Register." If you already have an account, click "Log in." You can also scan the QR code to download the TUYA app.

CONFIGURING THE GATEWAY

1. Install the device according to the installation instructions provided. Once the power is turned on, wait for the device to initialize. After that, follow the on-screen instructions to connect the device to the Wi-Fi network.
2. Open the Tuya app, tap the scanner icon  in the upper right corner, and scan the QR code on the device. Follow the instructions on the app interface after the device successfully starts.

ADDING THE MAXLIGHT GATEWAY TO THE APP

You can add the device directly from the app by following these steps:

1. From the main menu or home screen of the app, select "Add devices" or tap the  icon.
2. Ensure the gateway is powered on and in pairing mode (indicated by flashing lights).
3. The Tuya app will automatically search for nearby devices. Wait for the gateway to be detected.
If it's not detected, proceed as follows:
the icon  → add device → gateway → Zigbee gateway → select the correct gateway model.
4. Once the gateway is detected, a list of available devices will appear. Select the gateway from the list, and after a successful connection, the app will confirm the addition. A confirmation message or screen will appear. Ensure the gateway is functioning properly.
5. Congratulations! Your Maxlight Gateway has been successfully added to the Tuya app and is ready for intelligent control. Repeat this process to add additional smart devices to your app.
